

Amendments to the Claims

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1 through 38. (Canceled)

39. (New) A method for presenting information relating to a deceased person, the method comprising:

- a) receiving biographical information relating to a deceased person, wherein the deceased person is associated with a cemetery;
- b) storing the biographical information relating to the deceased person in a computer readable medium;
- c) receiving a request for at least a portion of the biographical information relating to the deceased person, wherein the request is received from a user located within the cemetery, wherein the request is made by the user through a device operable to transmit the request from the user, wherein the device is located within the cemetery; and
- d) transmitting at least a portion of the requested biographical information relating to the deceased person, wherein the transmitted biographical information relating to the deceased person is transmitted from a transmission location within the cemetery to the device located within the cemetery, the device being further operable to present at least a portion of the transmitted biographical information to the user located within the cemetery.

40. (New) The method of claim 39, wherein the computer readable medium is located within the cemetery

41. (New) The method of claim 40, wherein computer readable medium is located within a cemetery office located within the cemetery.

42. (New) The method of claim 40, wherein the deceased person has a grave site located within the cemetery, wherein at least one of the computer readable medium or the transmission location is located at or proximate to the grave site.

43. (New) The method of claim 39, wherein the transmission location is located within a cemetery office located within the cemetery.

44. (New) The method of claim 39, wherein the computer readable medium further includes biographical information relating to a plurality of deceased persons.

45. (New) The method of claim 39, wherein the device comprises a portable electronic device.

46. (New) The method of claim 45, further comprising providing the portable electronic device to the user for a limited time.

46. (New) The method of claim 45, wherein the portable electronic device comprises at least one of a personal digital assistant or a laptop computer.

47. (New) The method of claim 39, wherein the computer readable medium is located within a kiosk located within the cemetery.

48. (New) The method of claim 39, wherein the device comprises a kiosk located within the cemetery.

49. (New) The method of claim 48, wherein the transmission location comprises a kiosk located within the cemetery.

50. (New) The method of claim 39, wherein the at least a portion of the requested biographical information relating to the deceased person is transmitted to the device wirelessly.

51. (New) A system for presenting information relating to a deceased person, the system comprising:

- a) a computer readable medium comprising data representing biographical information relating to a deceased person, wherein the deceased person is associated with a cemetery;
- b) a processor in communication with the computer readable medium, wherein the processor is operable to receive a request for at least a portion of the biographical information relating to the deceased person from a user located within the cemetery;
- c) a transmitter in communication with the processor, the transmitter being operable to transmit at least a portion of the requested biographical information relating to the deceased person, wherein the transmitter is located at a transmission location within the cemetery; and
- c) a device operable to present at least a portion of the requested biographical information to the user located within the cemetery, wherein the transmitter is further operable to transmit at least a portion of the requested biographical information relating to the deceased person to the device in response to the request for at least a portion of the biographical information relating to the deceased person.

52. (New) The system of claim 51, wherein computer readable medium is part of a computer system located within a cemetery office located within the cemetery.

53. (New) The system of claim 51, further comprising a grave site for the deceased person, wherein at least one of the computer readable medium or transmitter is located proximate to the grave site.

54. (New) The system of claim 53, wherein the grave site comprises a coffin, wherein the at least one of the computer readable medium or transmitter is located in the coffin.

55. (New) The system of claim 53, wherein the grave site comprises a head stone, wherein the at least one of the computer readable medium or transmitter is located in the head stone.

56. (New) The system of claim 51, wherein the computer readable medium further includes biographical information relating to a plurality of deceased persons.

57. (New) The system of claim 51, wherein the device comprises a portable electronic device.

58. (New) The system of claim 51, further comprising a kiosk located within the cemetery, wherein the kiosk comprises at least one of the computer readable medium, the transmitter, or the device.

59. (New) The system of claim 51, wherein the transmitter is operable to transmit the at least a portion of the requested biographical information relating to the deceased person to the device wirelessly.

60. (New) A method for presenting information relating to a deceased person, the method comprising:

- a) receiving biographical information relating to a deceased person, wherein the deceased person is associated with a cemetery;
- b) storing the biographical information relating to the deceased person in a computer readable medium;
- c) receiving a request for at least a portion of the biographical information relating to the deceased person, wherein the request is received from a user located within the cemetery, wherein the request is made by the user through a device operable to transmit the request from the user, wherein the device is located within the cemetery; and
- d) transmitting at least a portion of the requested biographical information relating to the deceased person, wherein the transmitted biographical information relating to the deceased person is transmitted to the device located within the cemetery, the device being further operable to present at least a portion of the transmitted biographical information to the user located within the cemetery.

61. (New) The method of claim 60, wherein the transmitted biographical information relating to the deceased person is transmitted from a transmission location within the cemetery.

62. (New) The method of claim 60, wherein the device is electronic and portable.

63. (New) The method of claim 60, wherein the computer readable medium comprises data representing biographical information relating to a plurality of deceased persons.
